

SB SERIES

Slide Bolt

SPECIFICATIONS

Base material: Solid Brass

Function: To secure one door to the cabinet in double door applications. Allows for door to lock shut when bolt is engaged from the inside. Requires releasing bolt to open the door.

Bolt: 3" length, manually engaged

Non-handed: Can be used on right-hand or left-hand doors.

Finish: US26 (polished chrome)

PACKAGING

SB-3-26D: Packed individually. Bolt and strike packaged individually with four screws.

SB-3-US26

Packed individually. Bolt and strike packaged individually with four screws.

FUNCTION: Used to secure one cabinet door from the inside. The opposite door uses a cabinet lock to then lock against the secured door or into the top or bottom rail of the cabinet.

WARNING: This product can expose you to chemicals including chromium, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.
